

Cartic Finance is a top tier defi platform, Cartic platform is a large scale decentralized blockchain based DApp which exists for the sponsoring of the defi space. The Cartic Finance dev team has put in a great deal of work in making the staking and lending protocol as smooth as possible, this was made possible by the seamless layering of defi protocols to achieve the best user experience possible, coupled with bug free execution.

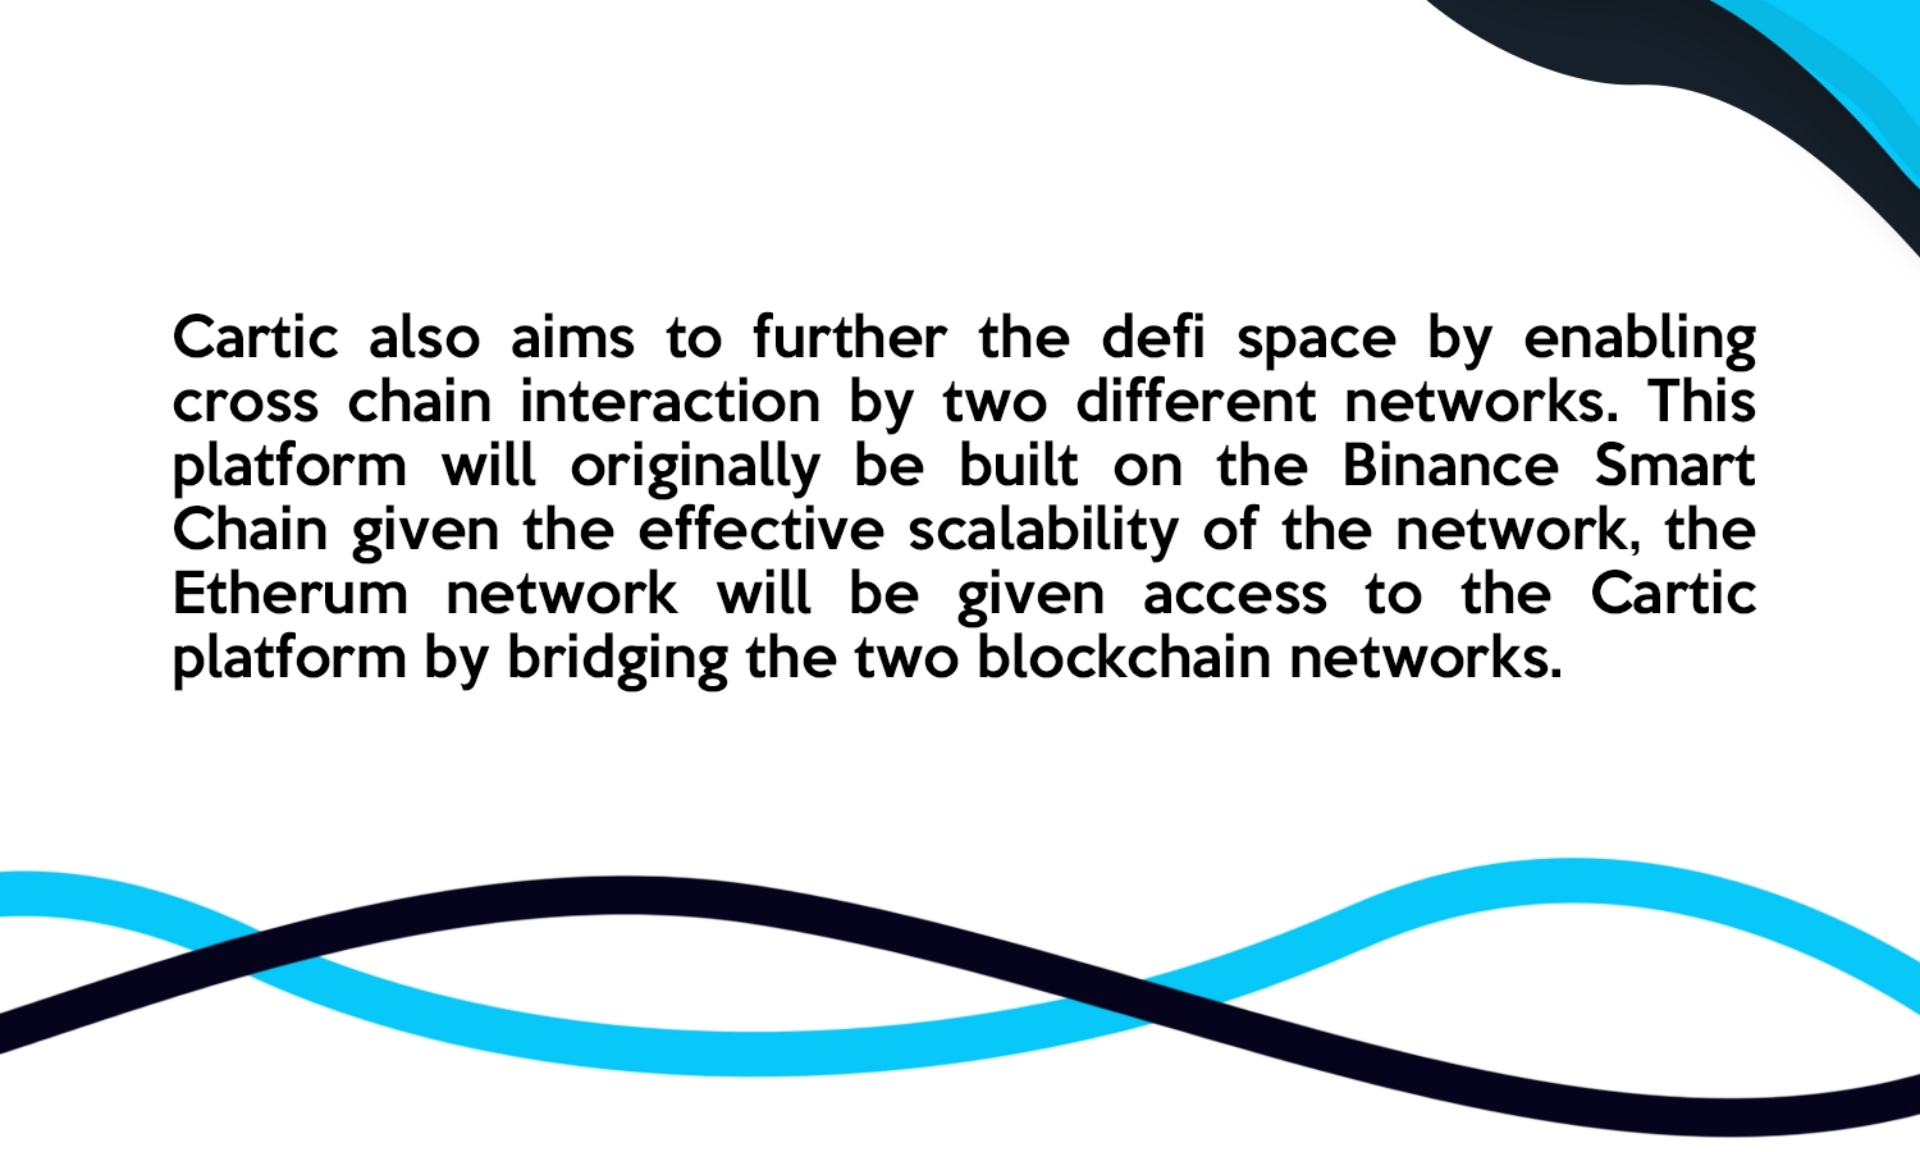

The acceptance of crypto will only keep growing as the world fast approaches the age of decentralization, we plan be the front runners on crypto finance.

**Cartic will explore various means of generating finance from the use of staking to the use of hypodepositry; where a user can deposit funds in a liquidity pool and earn passively and actively, by aiding our developers in test runs and advertising of the token flexibility with certified tokens gotten from the end product of the test run. This will not only help the growth of Cartic Finance but actively involve the public in blockchain enlightenment, the users will closely monitor the progress of any ongoing feature which is in development by the dev team.**

Cartic also aims to further the defi space by enabling cross chain interaction by two different networks. This platform will originally be built on the Binance Smart Chain given the effective scalability of the network, the Ethereum network will be given access to the Cartic platform by bridging the two blockchain networks.

# FUTURE OF FINANCE

Cartic is a decentralized finance protocol operating on cross chain integration platform created by top blockchain developers.

The blueprint of this project begins from the integration of financial solutions to laying the building blocks for the proper realization of the WEB 3 in the world of finance. This movement of cross chain technology does not only to the interactions of two or more blockchain but also in the aspect of creation and implementation of multiple earning and teaching technology on the subject of defi protocol. This creates a revolutionized way of raising funds which involves high stakes and worth stakes.

The Cartic dev team has built the DApp for the purpose of basic defi activities. Users can stake, swap and earn with much higher APYs, recording at +150%. Farming on cartic will be launched as the project goes live, first round of users will earn as much as 300%.

# CARTICNOMICS

Token: CRTI

Total Marketcap: No data

Network: Binance Smart Chain (BEP20)

Token distribution:

- Cartic Launch
- Development Fund

Deflationary Mechanics: Token Burn

# WHY NO HARD MARKET CAP?

This will help in the exponential growth of Cartic in the world of crypto and making sure we can all keep growing with Cartic. This will also give rise to more projects and upgrades running on Cartic.

**OUR MAIN AIM IS TO PROVIDE ON  
DEMAND, THEREBY PROVIDING  
INCENTIVES FOR OUR DEAR CARTICIANS.**

# TOKEN DISTRIBUTION

## CARTIC LAUNCH:

The distribution of the Cartic tokens will be done on a scale that the air drop will be carried out on our social platforms.

Then the open phase of the liquidity mining begins, early miners will receive higher block rewards before the burn that reduces the block by 50%.

## DEVELOPMENT FUND:

15% of circulating supply will be with the dev team for funding and expanding the team to make Cartic a much better platform for our Carticians worldwide.

# LIQUIDITY PROVIDERS

Pancake Swap: 15%  
Bakery Swap: 10%  
Cartic Finance: 75%

As Carticians provide more CRTI-BNB flip tokens in the farm section, they farm Cartic earning higher rewards.

# DEFLATIONARY MECHANICS

Token burn is used to keep the minting on demand of Cartic in check to prevent inflation of Cartic and also keep its price going strong, we chose to burn 50% of every 1,000,000 minted CRTI, reducing the effective emission rate to 50%.

This will not only prevent inflation but also give rise to the bonus farming phase which will give liquidity providers a period to farm more tokens before the burning, before every burn it will surely be passed across on all social platforms to keep all Carticians informed.

# ROAD MAP

- Cartic Launch
- Listing on Pancakeswap
- Marketing
- Launch of Cartic.Finance v1
- Cross-chain Protocol Live
- Full Scale Marketing
- Launch on CEXs
- Launch of Cartic.pro
- Hypodepository Unvail
